

# Reference Materials for Blockchain-Based Supply Chain Management

## 1. Research Papers

- **"Blockchain for Supply Chain: A Systematic Literature Review"**  
Explains blockchain's impact on transparency and traceability.  
[Link](#)
- **"Blockchain Technology in Supply Chain Management: Use Cases and Challenges"**  
Focus on real-world applications in logistics.  
[Link](#)

## 2. Tools & Technologies

- **Ethereum/Solidity:** For developing smart contracts.  
[Docs](#)
- **Hyperledger Fabric:** Enterprise-grade blockchain framework.  
[Docs](#)

## 3. Key Concepts

- Smart contracts for automating transactions.
- Blockchain consensus algorithms like PoW or PoS.
- Use of IoT for real-time supply chain data integration.
